Our Offerings

Our Pricing

We work based on the agreement and alignment with our client.

Outcome Based Pricing

Outcome Based Pricing – This model focuses on measurable results rather than hours or fixed scope. It is ideal for AI agents, automation workflows, and performance-driven projects where success can be clearly tracked. Clients pay only for the defined outcomes achieved, ensuring maximum value and transparency.

Fixed Cost Model

Fixed Cost Model – For our fixed cost model, we will agree a fixed price that won't change after a consultation. This works best for tech companies and web entrepreneurs who know their precise requirements (scope) and exactly which services they need.

Time & Hourly Material Model

Time and Material Based Model – This is the most suitable model for long-term projects, where scope is partially determined, so we discuss an hourly rate and timescale. We will then discuss any other factors that may affect the projected price.

Hourly Based Model

Hourly Based Model – When there is an idea of scope but no price estimation has occurred, we will work at an hourly model. This model is flexible and suitable for a wide range of clients.

THANK **YOU**
